

DisinfectionBooster

Disinfect shopping carts

How does it work?

- The shopping cart is positioned in the indicated place by the customer
- The Booster is equipped with a sensor that detects that the shopping cart is there
- The signal lamp switches to orange, the cobot with nozzle starts to move
- In 15 seconds the cobot sprays the handle of the shopping cart from below and above
- The light turns green: the shopping cart is ready to be taken by the customer

This set-up has been specifically developed to disinfect shopping carts. The Disinfection Booster consists of a cabinet with a cobot, which contains the controller and the disinfectant.

Characteristics

- Dimensions - 1150 x 680 x 890 mm
- Weight - 140 kg (excluding robot)
- Power supply - 230 VAC
- Transport - wheels/pallet truck
- Disinfection container - 20 liters
- Wet materials - chemically resistant
- Emergency stop
- Signal lamp
- Option - 2-sided workable
